The amendment to this application received on July 5, 2005 had the incorrect application number on it and was entered under a related application, then transferred to the correct application. The amendment is missing some drawing sheets and the drawing sheets present with the amendment do not appear to be the correct drawing sheets, as the brief descriptions of the drawings in the amendment do not agree with the drawings filed.

Specification

1. The amendment filed July 5, 2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The brief descriptions of Figures 7 through 12 added to page 5 are considered new matter. The lack of correct drawing sheets prevents evaluation of the content of the drawings.
2. The "snap in insert that will fit in the second member of such lap top tray," "apparatus 10 adjusts to minor differences in, for example, the diameter of the second member," and "such means includes a rubberized surface 27 on the outer surface of the apparatus 10" in the paragraph added to page 6 are considered new matter.

Applicant is required to cancel the new matter in the reply to this Office Action.

Drawings

3. The amendment filed July 5, 2005 referenced new drawing sheets, however, some of the drawing sheets are missing and those present do not appear to be the correct drawing sheets. Therefore, the new drawings could not be addressed.

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the non-skid surface on the first and second sides of the first member (claims 4, 5), the adjustable diameter of the ring in the second member (claim 9), the means to prevent slipping of the ring in the second member (claim 10) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 3727

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 9-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 9 recites an adjustable diameter but this is not shown and the specification does not describe how this is accomplished. Claim 10 recites a means to prevent slipping but this is not shown and the specification does not disclose any means for accomplishing this. Claims 11 and 12 are dependent on claim 10.

Allowable Subject Matter

3. Claims 1-7, 13-18 and 22 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: independent claims 1 and 22 now disclose the combination of the apparatus and the specially configured fluid container, which is the intent of the applicant per the remarks filed in the amendment of July 5, 2005. This combination is allowable over the prior art.

Response to Arguments

5. Applicant's arguments filed July 5, 2005 have been fully considered but they are not persuasive. Applicant argues that the rejection of claims 9-12 under USC 112, first paragraph have been overcome by the amendment to the specification and addition of new drawings. In response, the amendment to the specification, as it relates to these

claims is considered new matter and not entered in the specification. Additionally, the new drawings are missing from the amendment, as filed. Based on these facts, the rejection of claims 9-12 is not overcome.

6. The applicant argues that the objection to the drawings is overcome by the new drawing sheets submitted, however, new drawings are missing from the amendment, as filed, as discussed above. Thus, the drawing objections are not overcome.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
